

Custom Barrel Insulation Quote Request Form

To request a quote, simply call 800-627-1033 with the following information:

CUSTOMERNAME: _____ CONTACT: _____

CUSTOMERNO.: _____ PHONE NO.: _____ FAX NO.: _____

SPECIFICATIONS

MACHINE MAKE: _____ MODEL NO.: _____

SIZE: _____ (millimeters/inches) OUNCE CAPACITY: _____ (ounces)

MOLDING PROCESS: Injection Extrusion Blow Molding Thermoset

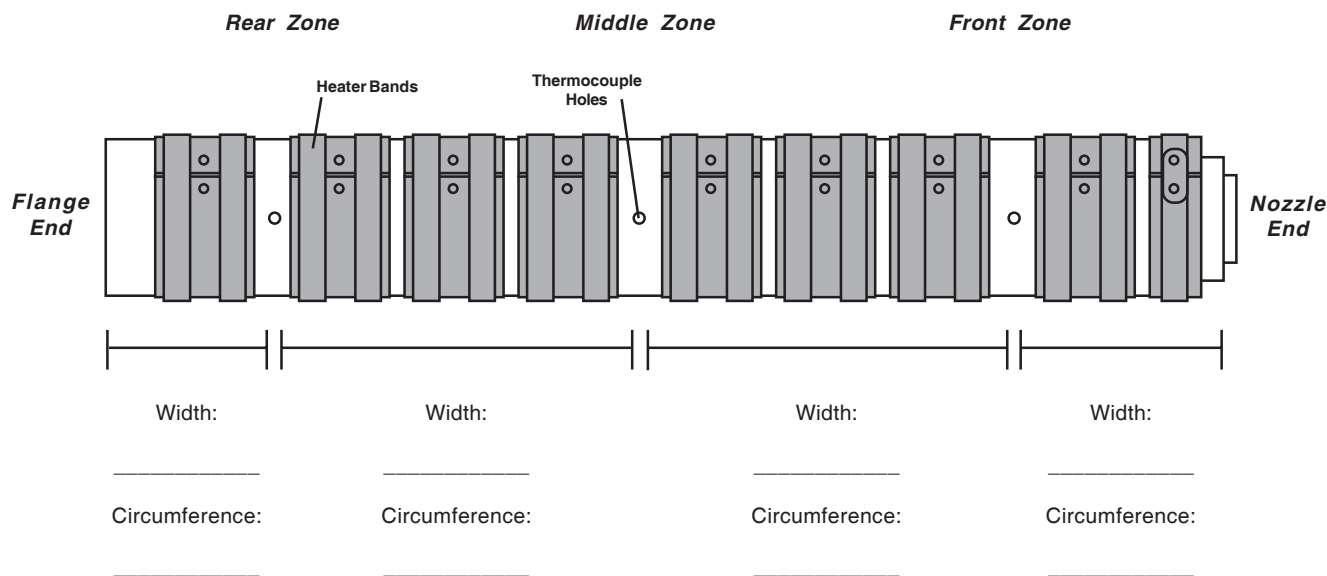

TYPE: Vented Bell End Straight End

MEASURING INSTRUCTIONS:

- Measure from face of flange to first thermocouple.
- Measure from first thermocouple to second thermocouple.
- Follow suit through front of barrel measuring between thermocouples.
- Measure circumference with tape measure. Always measure O.D. of heater band. If there is a junction box, measure over it.
- Record dimensions on diagram below.

HINTS:

- The rear of the machine is where the hopper is.
- Always measure machines from operator side.
- The front blanket will end at the large diameter of the barrel, right behind the nozzle adapter.
- The measuring tape should fit snug, no slack.

If your barrel has more than 3 thermocouples, continue measuring in the same manner as above and record dimensions below.

Width: _____ Circumference: _____ Width: _____ Circumference: _____ Width: _____ Circumference: _____
